

# Trap Controllers

WE OFFER A WIDE RANGE OF TRAP CONTROLLERS, WITH SYSTEMS SUITABLE FOR INDIVIDUALS, SMALL CLUBS OR RANGES, AND LARGE COMMERCIAL GROUNDS.

Claymate Pro-Delay

Great for solo shooting. The *Claymate Pro-Delay Cable* fits between the trap and a standard release, footswitch or radio release. 2.5 second delay between pressing fire and the trap release. Press twice to get a following pair; up to 6 times for a mini flurry. Simple, waterproof and no batteries to worry about.

Use our *Foot Switch* to release clays while keeping both hands on the gun. A heavy duty unit designed to take field use. Includes 3 Pin weather resistant plugs and fittings.

Foot Switch Kit

The *Claymate Wireless Single Trap Kit* operates one trap to 200+ yard range. Commercial quality transmitter, receiver & stand. Meets FCC standards. Waterproof.

Promatic Single Trap Wireless

The *Claymate Wireless ATA Trap Kit* provides complete operation of ATA traps. The unit turns oscillation on/off (bypassing automatic shutoff) and controls horizontal inching when the trap is in a stationary position. Transmitter, Receiver with 6' Cable and 7 pin ATA/DTL plug. Includes Receiver Stand. Waterproof.

The *Claymate Wireless Two Trap Sporting and Skeet Kits* operate 2 traps to a 200+ yard range. "Double" button allows for immediate simultaneous release of both traps. The set includes a commercial-quality transmitter and receivers with duraplugs. The Sporting kit includes a stand for each receiver. Meets FCC standards. Re-program with a magnet instead of dip switches. Waterproof. **A 3 trap kit is also available.**

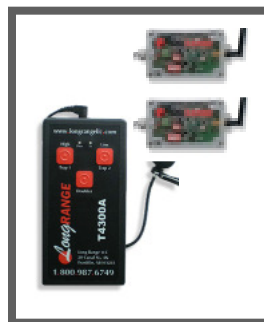

Promatic Two Trap Wireless

Long Range Two Trap Wireless

The *Long Range Two Trap Wireless 4300 System* operates two traps to give singles, reports or true pairs. With 127 channels to choose from, the receivers can be used on adjacent stations with no interference. Instant on and transmit with 30,000 operations on single battery. 200+ yards. Includes T4300A transmitter, 2 R4300 receivers and duraplugs.

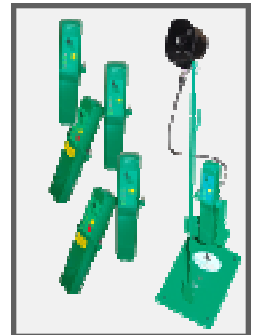

The *Long Range T-4300 Voice Release System* integrates voice circuitry onto the T4300A. The unit controls two traps to give singles or true pairs. Unhook the microphone and the unit reverts back to a regular T4300A. Includes lapel microphone, T4300AV transmitter, R4300 receiver

Long Range T4300 Voice Activated

Ask about the T4300A voice release that plugs directly into the Long Range Target Key counter system.

The *Canterbury ATA Trap Release System* is available Wired or Wireless. Both models feature a 1/6th sec delay from the shooter's call to trap activation. A remote trigger unit for the scorer has an 'on/off' switch, a 'push' button for testing the trap release & a light that blinks off when the trap is activated, allowing a visual check w/o walking forward of the shooting line. On the wireless systems each microphone is linked by a short cable to its own transceiver.

# Trap Controllers

**WE OFFER A WIDE RANGE OF TRAP CONTROLLERS, WITH SYSTEMS SUITABLE FOR INDIVIDUALS, SMALL CLUBS OR RANGES, AND LARGE COMMERCIAL GROUNDS.**

The *Claymate Wireless Wobble Trap Kit* provides complete operation of wobble traps. The transmitter turns the wobble on/off (bypassing automatic shutoff) and controls horizontal and vertical inching movement when the trap is in a stationary position. Includes 6' cable, 7 Pin DTL/ABT plug and receiver stand. *Unit not shown.*

The **Long Range MT4300C Wobble Kit** transmitter can turn on/off horizontal and vertical movement of up to 4 different wobble traps and the nudge function allows you to move the position of each trap in small increments. Set includes the MT4300C controller, WR4300 wobble receiver with duraplug and 5 Pin XLR plug.

MT4300C Wobble Kit

Claymate JR Multi-Trap

Our lowest cost 5-Stand system, the *Claymate Junior Multi-Trap Controller*, includes a simple menu structure for easy intuitive display and a liquid crystal display panel that identifies the targets and launching sequences selected. The unit has pre-programmed NSCA 5-Stand sequences which can be shot as 5-Stand or Compak Sporting, six pre-set Flurry sequences and 6 programmable sequences for custom flurries. The handset can be locked to a specific sequence for 'drill-free' shooting stand operation and supports automatic or manual flurry release with correct 'No Bird' handling. This system includes an audit capacity of ten million targets. Wired system. **Ask about our new Wireless Claymate JR (upgrades also available)!**

Our *Claymate Wireless Six or Eight Trap Sporting Kits* provide for manual control of multi-trap layouts such as 5-Stand. The transmitter includes a Solo Delay option to add a 3 second delay between pressing the button and the actual firing of the trap. The unit includes an audible tone to indicate when the delay has been turned on/off. True pairs are released by pressing two buttons simultaneously.

Promatic Wireless Sporting

Long Range MT4300 C

The *Long Range MT4300C Manual 6 Trap 5-Stand / Sporting Package* can control up to 15 traps per field on 255 different fields. The system includes a solo shooter system and a target counting feature. The set includes 1 MT-4300C multi-trap transmitter, 6 R4300 digital receivers and duraplugs.

The *Long Range MT4300 5-Stand Package (6 or 8 trap)* is programmable for 5-Stand, FITASC, Flush & Flurry, Compak and your own games and can also be used in manual mode. The system controls up to 15 traps per field on 255 different fields and uses spread spectrum technology to eliminate interference between fields. This unit will

throw up to 55,000 targets on a full charge. Each set includes the MT-4300 multi-trap transmitter, 6 or 8 R4300 digital receivers and duraplugs. Fully integrates with the Long Range Target Key counter system.

Long Range MT4300

## CLAYMATE Wi-CARD CLAY COUNTING SYSTEM

### INCREASE YOUR INCOME BY 40%

At a time when Range Owners are facing tough financial challenges and are concentrating on maximizing their income, Promatic Claymate has released the Wi-Card Clay Counting system.

**Wi-Card ensures you get paid for every clay thrown on your ground** and offers great features for you and your customers.

Claymate users report sales increasing by 30% to 40% and clay usage falling by 30%. For many clubs it has meant the difference between a successful business or having to close!

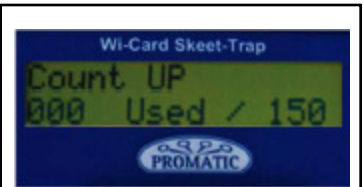

**The cards are low cost but high tech.** Our built-in security encryption means cards are unique to your ground. They can be locally printed and even used as your club membership card. The master card can be used to automatically close down each station and ensure no unauthorized use of your grounds after hours. No computer is required to operate the system.

**The system is easy to use and understand.** During initial set up you can choose to count targets only or have total flexibility in charge rates. You can charge different rates for sporting or skeet (up to 8 disciplines), members or guests, or even charge different rates per station for things like expensive battue targets. You choose how each customer will pay by setting their card as pre-pay (count down) or pay when finished (count up). Our stand alone programmer makes the cashier job a snap. To display stored information simply lay the card on the programmer.

**Shooters will love the cards.** The cards are the same size and thickness as a credit card and have no batteries or connections. Embedded in the card are clever electronics which, when held close to the control unit, use secure wireless communication to count the number of clays a shooter throws. When the card is placed close to the control pad, the ultra large LCD display shows what is happening at all times. The display shows the target count while the built-in speaker provides audio confirmation such as the Solo Shooter audible countdown.

**The system performs flawlessly in all weather conditions.** Because there are no contacts on the cards or the control units, the system can handle everything mother nature can throw at it – rain, sleet, snow, dew, mud or dust.

- Systems for Sporting, 5-Stand, Skeet, ATA Trap and Olympic Trap
- 100% reliable in all Weathers
- Pre-wired for all Promatic Traps
- Cards can be set to count up or down
- Cards can be either Target based (system adds or subtracts each target) or ...
- Cards can be cost based (system adds or subtracts the COST of a target from a cash 'pot')
- Cards can be set to start or stop from any target value from 1 to 9,999 targets
- Multiple Charging: Members or Guests rates, Sporting or Skeet, Standard or Rabbits – You decide what to charge
- Single or Double Arm Counting
- Solo Shooter Delay
- End of day Shut Down, and Morning Wake up routines so you control your opening times
- Single Targets, Following Pairs or True Pairs
- Controllers all feature a large 2 line 16 character display to show target selections, targets thrown and other system information.
- Ground Code and Identification Number match card & ground for total security
- Controllers can be securely set to 'Free-Play' for competition days when target counting is required as well as clay launcher control but without needing a card to operate
- Stuck button detection
- Connectors for two handsets
- Full Audit functions
- Easy to use menu system and shooter instructions on each unit
- Audio feedback to shooters
- Cards can be printed as membership cards
- Compatible with Super Sporting, Skeet/Trap Claymate and Multi-trap controllers including Evolution

COUNT UP TARGETS USED AND CHARGE AT THE END OF THE DAY

IF A SHOOTER TRIES TO USE A CARD FROM ANOTHER GROUND

PRE-PAY TARGETS IN ADVANCE AND THEN COUNT DOWN

ONCE YOU CLOSE A STAND IT IS LOCKED FROM USE

EVEN INTRODUCE A NON PROMATIC CARD
