

# Sporter 400TT Series

**DESIGNED & BUILT SPECIALLY FOR THE WORLD MARKET; WITH MORE POWER, CAPACITY AND HEAVY DUTY COMPONENTS**

Sporter 400TT

The *Sporter 400TT*, with its 400 target capacity and Tilt & Turn base, is designed and built for large clubs and commercial grounds. The 33% increase in capacity, heavier duty components, high torque motor, and upgraded electronics enables the trap to handle the additional usage seen in harsh commercial environments.

With eight variations, the Sporter 400TT series can be used across your entire Sporting, FITASC, or 5-Stand courses. Because all eight models have a commonality of parts and set-up, tasks such as course changes, maintenance and trap servicing are more easily learned by your ground staff.

Our *Sporter 400TT Left Hand* uses negative curl to throw a completely different flight profile and is available in a standard or midi carousel.

The full series of Sporter 400TT traps integrate perfectly with our specialist traps, the Chondel and Rabbit.

- 400 clay capacity
- 100 plus yards throwing distance
- 1.5 seconds re-cocking time
- Proven "Knife Edge" system to feed wet or frozen clays without failure
- Stainless steel throwing plate, alloy and corrosion protected parts for long lasting rust protection
- Powered by 12 volt battery or optional 110v transformer
- Throws standard or midi clays.
- Left Handed model for Std/Midi or Battue
- Mini version available
- Comes with 162' release cable, quality release switch and comprehensive owners manual
- Lifetime guarantee on the clutch and one-way bearing; 3 year warranty on all other parts

## HINTS AND TIPS

### LEFT-HANDED

When designing a competition Sporting/FITASC course, consider using two or three of our left-handed models. These machines use negative curl to throw a different flight profile from any other trap on the market.

Stainless Steel Knife System

OPTION	DESCRIPTION
Footswitch	Ideal for solo use as it allows the shooter to release targets while keeping both hands on the gun. It is a heavy duty unit designed to take field use.
Extension Cable	162' extension cable for increased distance between the shooter and trap.
Radio Release Systems	Say goodbye to trailing wires and allow for quick course changes. High efficiency units allow for wireless use of any Promatic launcher. Great for solo shooting. Short cable fits between the trap and a standard release, footswitch, or radio release. 2.5 second delay between pressing fire and the trap release. Press twice to get a following pair; up to 6 times for a mini flurry. Simple, waterproof, no batteries or wiring.
Pro-Delay Cable	
Cart	This 2 wheel cart with pin-hitch connection makes any sporting Promatic machine fully portable. Includes battery mount and 12" solid rubber tires.
Solar Panel	Harness the power of the sun to maintain the charge in your battery for continued shooting for days without the worry of the battery losing charge.
Transformer	Add our transformer to run your machine on either 110v electricity or 12v DC power.

# *Sporter 400TT Series*

**DESIGNED & BUILT SPECIALLY FOR THE WORLD MARKET; WITH MORE POWER, CAPACITY AND HEAVY DUTY COMPONENTS**

**Sporter 400TT Wobble**

The *Sporter 400TT Battue* throws battues either right side up or upside down. Built on the famed Sporter 400TT platform, this trap is designed for rigorous use at commercial ranges and provides a host of presentations never before seen by the sporting market.

For even more variety in flight path and target presentation, our *Sporter 400TT Left Hand Battue* is also available.

Both models are easily adjusted for total flexibility and multiple target presentations.

★ *Our staff can provide a range of integrated services from Course Design through Installation, Training and Maintenance. Call our office for more information and we will be happy to help you attain your project goals.*

The *Sporter 400 TT Wobble* is an ideal choice for any ground that does not need the bird speed and throwing range that the Super Sporter offers. Upgraded from our Ranger series, the Sporter 400TT Wobble has high power dual motor wobble movement on the horizontal and vertical planes, six different rotation angle settings, and three different elevation angle settings.

As with all of our ATA and Wobble models, the oscillation motors can be turned on/off to provide full control over trap movement.

The machine also features a built-in timer to stop the oscillation motors once shooting has finished, thus extending battery life between charges.

## **HINTS AND TIPS**

### **BATTUES**

We sell Battue models in our Eagle, Ranger, Sporter 400TT and Super Sporter series. Each one has the capability to put battues in right side up or upside down. Try varying this to provide a very different flight path and target presentation to give your shooters variety and something different in competitions.
