

**THE SUPER HAWK IS OUR LARGEST SINGLE STACK MACHINE WITH A CAPACITY OF 65 STANDARD OR MIDI CLAY TARGETS.**

# Super Hawk & Super Hawk Wobble

The challenge to our design team was difficult - *Produce the most competitively priced clay pigeon trap available, suitable for personal use, but matching the performance of traps found on commercial grounds.* The design solution was the **Super Hawk**. Throwing clays every second, allowing you to create a true following pair, while its powerful motor can throw targets up to 100 yards. If that speed and distance are not challenging enough, switch to the midi magazine and truly test your skills.

The **Super Hawk Wobble** combines all the benefits of the standard Super Hawk, plus the addition of a wobble base for full wobble and completely random targets. You have the option to turn off the base and shoot a repeat target, or turn on the base and challenge yourself to spontaneously thrown clays. This versatility has made the Super Hawk Wobble a popular choice for the seasoned shooter wanting a personal use machine. The newly designed wobble base includes our 2-wheel hand-pull trolley.

Super Hawk

★ Add our Pro-Delay cable to the Super Hawk Wobble to shoot a mini bird flurry!

Super Hawk Wobble

- Capacity - 65 Clays
- Throwing distance - up to 100 yards
- Max Elevation - 50 degrees
- Throws Standards and Midis with a quick change of the magazine
- Powered by 12 volt battery
- Quality motor gear unit and clutch for 3/4 cocking ensures smooth operation and long life
- 162 ft cable with quality release switch
- Rapid movement to allow ultra fast re-cocking.
- Wobble model includes angle adjustment and oscillation on/off controls
- Lifelong warranty on clutch and one-way bearing; 1 year warranty on all other parts with option to extend 3 additional years

OPTION	DESCRIPTION
Footswitch	Ideal for solo use as it allows the shooter to release targets while keeping both hands on the gun. It is a heavy duty unit designed to take field use.
Extension Cable	162' extension cable for increased distance between the shooter and trap.
Radio Release Systems	Say goodbye to trailing wires and allow for quick course changes. High efficiency units allow for wireless use of any Promatic launcher.
Pro-Delay Cable	Great for solo shooting. Short cable fits between the trap and a standard release, footswitch, or radio release. 2.5 second delay between pressing fire and the trap release. Press twice to get a following pair; up to 6 times for a mini flurry. Simple, waterproof, no batteries or wiring.
Cart	This 2 wheel cart with pin-hitch connection makes any sporting Promatic machine fully portable. Includes battery mount and 12" solid rubber tires.
Solar Panel	Harness the power of the sun to maintain the charge in your battery for continued shooting for days without the worry of the battery losing charge.
Transformer	power.
