

## CLAYMATE WI-CARD CLAY COUNTING SYSTEM

### INCREASE YOUR INCOME BY 40%

At a time when Range Owners are facing tough financial challenges and are concentrating on maximizing their income, Promatic Claymate has released the Wi-Card Clay Counting system.

**Wi-Card ensures you get paid for every clay thrown on your ground** and offers great features for you and your customers.

Claymate users report sales increasing by 30% to 40% and clay usage falling by 30%. For many clubs it has meant the difference between a successful business or having to close!

The cards are low cost but high tech. Our built-in security encryption means cards are unique to your ground. They can be locally printed and even used as your club membership card. The master card can be used to automatically close down each station and ensure no unauthorized use of your grounds after hours. Although no computer is required to operate the system, Clubhouse database software is available for clubs who wish to manage the system with a computer.

**The system is easy to use and understand.** During initial set up you can choose to count targets only or have total flexibility in charge rates. You can charge different rates for sporting or skeet (up to 8 disciplines), members or guests, or even charge different rates per station for things like expensive battue targets. You choose how each customer will pay by setting their card as pre-pay (count down) or pay when finished (count up). Our stand alone programmer makes the cashier job a snap. To display stored information simply lay the card on the programmer.

**Shooters will love the cards.** The cards are the same size and thickness as a credit card and have no batteries or connections. Embedded in the card are clever electronics which, when held close to the control unit, use secure wireless communication to count the number of clays a shooter throws. When the card is placed close to the control pad, the ultra large LCD display shows what is happening at all times. The display shows the target count while the built-in speaker provides audio confirmation such as the Solo Shooter audible countdown.

**The system performs flawlessly in all weather conditions.** Because there are no contacts on the cards or the control units, the system can handle everything mother nature can throw at it – rain, sleet, snow, dew, mud or dust.

- Systems for Sporting 2,3 & 4 Trap, 5-Stand, Skeet, Trap and Olympic Trap
- 100% reliable in all Weathers
- Pre-wired for all Promatic Traps
- Cards can be set to count up or down
- Cards can be either Target based (system adds or subtracts each target) or ...
- Cards can be cost based (system adds or subtracts the COST of a target from a cash 'pot')
- Cards can be set to start or stop from any target value from 1 to 9,999 targets
- Multiple Charging: Members or Guests rates, Sporting or Skeet, Standard or Rabbits – You decide what to charge
- Single or Double Arm Counting
