

# Super Sporter Series

## THE INTERNATIONAL COMPETITION STANDARD TRAP USED BY THE WORLD'S TOP SHOOTING FACILITIES

Promatic's *Super Sporter* series of traps are the international competition standard used by the world's top shooting grounds. Our simple, efficient design uses the finest components and alloys available to deliver unbeatable performance and versatility in a rugged heavy-duty package. The series is full featured, including throwing distances to 120 plus yards, elevation back to 70 degrees for near vertical targets, and the ability to lean the machine over to throw curling clays.

This *top-of-the-line* trap works day after day, year after year, withstanding weather extremes from -30° winters of Moscow to the oppressive heat of a Texas summer and the harshness of sitting atop a tower in the wilds of Scotland.

The *Super Sporter 8* holds 400 clays and is available in a standard or midi carousel. A mini carousel model is also available.

Our *Super Sporter Left Hand* model uses negative curl to throw a completely different flight profile and is available in a standard or midi carousel.

*Tilt Base set in Teal Position (up to 70° vertical) Shown on optional T-Cart*

- 8 stack — 400 capacity
- 10 stack — 500 capacity
- Accuracy to international competition standard
- 1.5 seconds re-cocking time
- 120 plus yard throwing distance
- Alloy body with stainless steel throwing plate
- Proven "Knife Edge" system to feed wet or frozen clays without failure
- Left Handed model for Super Sporter 8 Std or Midi
- Mini version available
- Powered by 12v battery or optional 110v transformer
- Comes with 162' release cable, quality release switch and comprehensive owners manual
- Lifetime warranty on the clutch and one-way bearing; 3 year warranty on all other parts

OPTION	DESCRIPTION
Footswitch	Ideal for solo use as it allows the shooter to release targets while keeping both hands on the gun. It is a heavy duty unit designed to take field use.
Extension Cable	162' extension cable for increased distance between the shooter and trap.
Radio Release Systems	Say goodbye to trailing wires and allow for quick course changes. High efficiency units allow for wireless use of any Promatic launcher. Great for solo shooting. Short cable fits between the trap and a standard release, footswitch, or radio release. 2.5 second delay between pressing fire and the trap release. Press twice to get a following pair; up to 6 times for a mini flurry. Simple, waterproof, no batteries or wiring.
Pro-Delay Cable	
Cart	This 2 wheel cart with pin-hitch connection makes any sporting Promatic machine fully portable. Includes battery mount and 12" solid rubber tires.
Solar Panel	Harness the power of the sun to maintain the charge in your battery for continued shooting for days without the worry of the battery losing charge.
Transformer	Add our transformer to run your machine on either 110v electricity or 12v DC power.

# *Super Sporter Series*

**THE INTERNATIONAL COMPETITION STANDARD TRAP USED BY THE WORLD'S TOP SHOOTING FACILITIES**

Also in the Super Sporter series are the *Super Sporter 8 Wobble* and *Super Sporter 10 Wobble*. These traps are available with all the features of our smaller wobble machines in a high performance, heavy-duty package.

Both traps have 7 elevation angle settings and 9 rotation angle settings and are available with hard-wired or radio-operated inching controls; making them a great coaching tool.

Each machine features a built-in timer to stop the oscillation motors once shooting has finished - extending battery life between charges.

The *Super Sporter 10 Wobble* has a 500 Clay capacity, making it the perfect machine for tower applications.

The *Super Sporter 8 Battue* is based on the Super Sporter for maximum performance. It throws Battues further, faster and at better angles than any other machine you can buy.

Just like its smaller brothers, it will throw the Battue targets either right side up or upside down without any additional adjustments required.

## **HINTS AND TIPS**

### **COURSE DESIGN**

The Super Sporter is an incredibly flexible machine for target setters. The spring has tremendous power and is precisely adjustable. This allows you to set the fastest targets possible or a slow curler while maintaining complete consistency of speed and length for each target. Couple this with the tilt base and ultra quick re-cocking, and you have the perfect competition machine.
